EURONEXT SECURITIES Shareholder Register Services

At Euronext Securities Copenhagen we offer a safe and simple Shareholder Register Service. Every limited liability company is obliged to hold a shareholder register – a list of all shareholders registered by name. If this takes place manually, it can be very time-consuming, but we can assist your company regarding the shareholder register. We offer you an efficient online shareholder register solution that is updated automatically daily with transactions from the Central Securities Depository (CSD). Our secure online platform is accessible 24/7 and is protected under the same standards as the CSD. This gives your company access to relevant shareholder data via a user-friendly interface. The shareholder register also forms the foundation for collecting data (registrations, proxies and postal votes) used to manage general meetings.

We offer a complete solution or selected services tailored to your needs. As our customer, you have access to investor services based on our expertise and know-how and a specialised IT platform. As your needs evolve, you can choose between a complete investor service solution or selected services. We are dedicated to create the best solutions for you and your investors.
